

MOBILE FLUID RECOVERY

3413 Hunter Road, San Marcos, TX 78666

855.OIL.SPIN (855.645.7746)

Justin Edmondson is the owner and CEO of Mobile Fluid Recovery (MFR) which is based in San Marcos, Texas. MFR is an industrial and hazardous waste recycling company that markets a patented technology to major automotive manufacturers in the U.S. and Canada. The technology is used to separate liquids from solids in industrial waste streams so that each can be managed more economically and sustainably. The customer base is currently in Texas, the Upper Midwest, Northeast and Southeastern portions of the U.S. as well as Canada. Justin's vision is to expand beyond the automotive industry and deliver this technology to the rest of the U.S. and Mexico. He holds two degrees from Texas State—a BBA in Marketing and a Master of Applied Geography in Environmental Management.

Prior to MFR, Mr. Edmondson was a partner in Gruene Environmental Companies where he marketed environmental services for hazardous waste disposal and recycling to companies across Texas. Justin has been in the waste industry for over 20 years and has earned a reputation as a successful salesman and visionary. He worked for Ashland for 10 years, creating their first program to reuse sulfuric acid and was the company's first salesman to penetrate the hazardous waste market in Mexico. For his accomplishments Ashland presented him with the prestigious "Top Gun" award which is given to the top salesman in the nation.

Mr. Edmondson served on the Board of Directors for the Texas State Alumni Association for 14 years, and was President in 2007. Originally from South Texas, he has lived in the San Marcos area for over 20 years and is a self-proclaimed river rat that enjoys kayaking and fishing the San Marcos River.
